

2pp . OPPT-2002-0059-0016

Hi Sara,

Thank you for providing the excellent draft summary of the EDMVS teleconference call.

I did make one comment which I would like included in the summary as follows:

Since fish are not covered by the Animal Welfare Act, I recommended that these validation studies should be conducted in accordance with the Public Health Service Policy on the Humane Care and Use of Laboratory Animals, which is applicable to all vertebrate species. This would ensure that all animal care and use was reviewed and overseen by an animal care and use committee, and that such care and use is accomplished in accordance with the NRC Guide for the Care and Use of Laboratory Animals.

Also, is there a transcript of the meeting available? If so, I would appreciate a copy.

Thank you,

Bill
